- z

Portfolio Website | *JavaScript, HTML, CSS, Git*

- Developed a responsive web portfolio from scratch using HTML and CSS.
- Utilized JavaScript to add more interactivity within the website such as a dark mode option.

E-Commerce System | *Java, Git*

- Utilized object-oriented principles through Java to implement class methods that made a functional and realistic E-commerce system simulator.
- The system consists of functions such as ordering a product, shipping a product, as well as tracking customers and their orders.
- Demonstrated advanced problem-solving skills and good use of several data structures by implementing many algorithms to create the functions of the system.

EXPERIENCE

SQL Database Trainee   Nov. 2022 – Present
Altaif Inc.   Toronto, ON

- Utilized a local MS-SQL Server to implement several SQL queries to get familiar with how database systems work.
- Connected to the company's windows server and accessed their MS-SQL database to familiarize myself with the infrastructure.

Sales Associate   Aug. 2022 – Nov. 2022
Champs Sports   Toronto, ON

- Assisted an average of 70 customers per day in a fast-paced environment while providing outstanding customer service.
- Played a significant role in increasing store profits by consistently surpassing given sales targets.
- Showed initiative to assist team members in handling customers, cash operations, and store maintenance when needed.
